

FOR CAFÉ & RESTAURANT OWNERS

ZORDIC

The AI employee that fills your tables

More customers. More repeat visits. More revenue — while you focus on great food and great service.

THE PROBLEM

Every café loses money in the same four places

Missed enquiries

A customer WhatsApps at 11 pm about tomorrow's booking. No reply until morning — and the booking goes to the café next door.

One-time visitors

Most guests visit once and forget you. Not because the food was bad — because nothing ever reminded them to come back.

Empty weekdays

Weekends are packed, Tuesdays are dead. You can see it happening, but there's no easy way to move demand to slow days.

No time for marketing

You're running a kitchen, managing staff, buying stock. Nobody has two spare hours a day for follow-ups.

Zordic is an AI employee — not another app

It works inside the app your customers already use every day: **WhatsApp**. Nothing to download, nothing to learn.

Receptionist, 24/7

Answers & books tables round the clock

QR ordering

Scan → order → kitchen. No waiters needed for taking orders

Loyalty

Points & rewards that bring guests back

Win-back

Spots regulars who stopped coming — re-invites them

Growth ideas

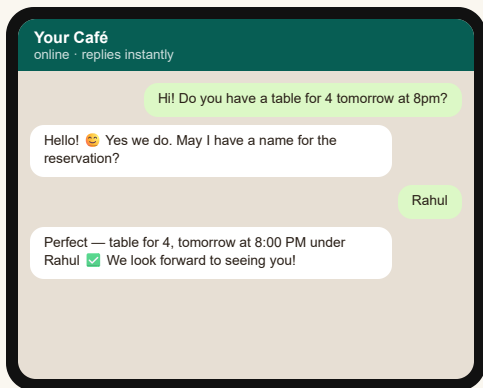

A concrete revenue suggestion every Monday

Knows its limits

Escalates big decisions to you, with advice

Watch it take a booking

✅ Answers **menu, prices, timings, location, WiFi** — instantly, any hour

✅ Books tables **end-to-end** — lands in your dashboard in real time

✅ Understands **English and Hindi**, replies in the customer's language

Routine is automatic. Important is escalated.

On big moments the AI calms the customer, then instantly alerts **you** — with a suggested action. Example:

WHAT THE CUSTOMER SEES

"The food was cold and I want a refund." → AI: "I'm so sorry — I've alerted the owner right now, you'll hear from us within minutes. 🙏"

WHAT YOU GET, INSTANTLY

- 🔔 Complaint / refund — Priya (98****4321): "Food was cold, wants refund."
- 💡 AI suggests: offer a fresh replacement or 15% off — protects your Google rating.

Also triggers for: big groups (8+), payment disputes, and questions the AI can't answer. Alerts hit your WhatsApp + a dashboard card.

FEATURE 3 · QR TABLE ORDERING

Scan. Order. Cooking.

1

Scan the QR

Menu opens in browser — no app
install

2

Order & track

Order + table number; live status

3

Kitchen screen

Ticket appears live — any tablet
works

Per-table QR codes **auto-generated & printable** in one click

Loyalty points **awarded automatically** when served

No mishearing, no wrong orders — the guest typed it themselves

Faster table turns at rush hour

Give guests a reason to pick you — again

Points on every order

Earned automatically — no punch cards, no staff effort

Tiers

New → Regular → VIP. Your best customers feel recognised

Birthday offers

Zordic keeps the list and sends the wish + offer for you

Customers check points just by asking on WhatsApp. Redemptions are staff-verified so nobody games it.

Your regulars quietly disappear. Zordic notices.

Detects

Flags every customer who hasn't visited in 14+ days — from real order data

Re-invites

AI writes a personalised WhatsApp offer with a unique coupon — you approve with one tap

Proves it

The coupon is tracked to the order that redeems it — see exactly how much revenue came back

Marketing you can measure in ₹, not likes.

Every Monday, one concrete way to make more money

EXAMPLE — MONDAY 10:00AM

"Tuesdays earn 38% less than average."

Suggested fix: a **Tuesday Treat** — 15% off 3–6pm, sent to your regulars on WhatsApp. Based on your own sales data.

✓ **Run this campaign — one tap**

Slow-day fixes, lapsed-regular pushes, birthday batches — always with the reason shown, always your decision.

Happy guests go to Google. Unhappy ones come to you.

5-star feedback

Gentle nudge to post on Google, with a thank-you coupon. Rating climbs on autopilot.

Unhappy feedback

Comes to you **first**, privately — before it becomes a public 1-star review.

AI reply drafts

Every review gets a ready-to-post reply draft in your voice.

Collected automatically

Requested over WhatsApp after the visit — no tablets, no awkward asking.

You see everything. From anywhere.

Live orders & revenue

Today's numbers, updating in real time

Customer chats

Every WhatsApp conversation, live and searchable

CRM

Every customer with visits, tier, tags and history

Expenses & P&L

Log costs, see profit — not just sales

Data sheets

Every table exportable to CSV — your data is yours

What is this worth to your café?

A typical café: 60 customers/day · ₹250 average bill

ESTIMATED EXTRA REVENUE

₹51,000 /month

That's 17× the Growth plan (₹3,000/month)

Conservative: loyalty + win-back lift repeat visits by just 8%, and 24/7 replies add 2 extra covers a day. This is the floor, not the ceiling.

GETTING STARTED

Live the same day. Seriously.

1 • Sign up

2 minutes at zordic.in/onboard — no card, no commitment

2 • Add your menu

Type it in, or send it to us and we'll do it

3 • Print QR codes

One click generates a printable QR for every table

4 • Connect WhatsApp

Guided setup links your number to the AI

10-day free trial on every plan

Full access from day one. Your data exports with you if you leave.

PRICING

Priced for cafés, not corporates

Starter

₹1,500 /month

- ✓ AI WhatsApp receptionist
- ✓ QR table ordering
- ✓ Basic customer CRM

MOST POPULAR

Growth

₹3,000 /month

- ✓ Everything in Starter
- ✓ Premium AI receptionist powered by Claude

- ✓ AI win-back campaigns
- ✓ Google review management

Pro

₹5,000 /month

- ✓ Everything in Growth
- ✓ Full AI marketing automation
- ✓ Weekly growth & revenue reports
- ✓ Priority WhatsApp support

Your café. Your customers. Your data.

Fully isolated account

No other café — and no one else — can ever see your data.

Daily automatic backups

A crashed phone never costs you your customer list.

Staff logins with roles

Give staff their own logins — without the owner keys.

Leave with everything

Every record exports to CSV whenever you want. No lock-in.

READY?

Let's make your café busier.

Start free today — 10 days, full access, no card. Your AI employee starts work the moment you sign up.
